Program :-

```
import numpy as np
import statistics as stat

lis = [4779736,710231,6392017,2915918,37253956,5029196,3574097,897934]
print("mean : ",np.mean(lis))
print("median : ",np.median(lis))
print("varience : ",np.var(lis))
```

Output :-

```
mean :   7694135.625
median :   4176916.5
varience :   128230435522129.22
```
